DRY FABRIC CLEANER

FOR PROFESSIONAL USE ONLY

Comes ready to use for hand cleaning or with a solvent approved upholstery extractor. Does not contain environmentally hazardous chlorinated solvents. Very versatile product which can be used as a dry cleaner. Can be boosted with Dry Cleaning Concentrate and can be used to rinse out blended solvents such as P.O.G. Does not have a typical dry cleaning fluid odour.

General Usage

Developed to clean “dry clean only” fabrics
Dry Fabric Cleaner was developed to efficiently clean fabrics which cannot be cleaned using traditional wet cleaning methods for upholstery, drapery or clothing.

Special formulation to loosen and remove varied soil types

The special formulation of selected solvents has given **Dry Fabric Cleaner** the ability to remove a wide variety of fabric soils no single dry solvent can. The result is an “across the board” cleaning ability to efficiently bring soiled fabrics back to a high appearance level.

Hints and Tips

Balanced evaporation cycle

Dry Fabric Cleaner's selected solvents provide efficient cleaning with a balanced evaporation cycle, resulting in reduced chance of increasing flammability. The result is greater safety during the drying process.

Can be used with either hand method or machine dry cleaning techniques

With a higher flash point (160⁰), **Dry Fabric Cleaner** offers greater safety when used in conjunction with traditional hand or specifically designed upholstery, drapery, or clothing dry cleaning equipment. The result is increased safety for cleaning personnel and decreased chance of unwanted injury by fire.

Dry Fabric Cleaner Characteristics

pH @ use:	N/A
Coverage:	N/A
Dilution:	Ready to use
