

URINE CONTAMINATION TREATMENT

FOR PROFESSIONAL USE ONLY

An anionic aldehyde solvent system. Deodoriser, developed specially for the neutralisation and deodorising of urine contaminated carpets, upholstery and hard surfaces (tiles and grouted areas etc) can be applied by sprayer, injection or mopping methods.

General Usage

For stubborn urine odours

Urine Contamination Treatment™ is the most effective chemistry available today for neutralising even the most severe urine problems

Removes odours on hard surfaces

In addition to carpet and upholstery, **Urine Contamination Treatment™** will control urine odours from tiles, concrete, wood floors, as well as other hard surfaces.

Holding down odours if recontamination is regularly occurring, treat area with Urine Contamination Treatment and leave in carpet until such time as product and urine can be extracted out. This will effectively contain and hold back any odour.

DIRECTIONS

1. The first step is to determine the location of the urine contamination. This is best done with an ultra violet lamp (black light), as the urine spot will glow. A moisture detector may also be used.

2. Saturate each urine spot with **Urine Contamination Treatment™** (Note: If odour is not too severe, product may be diluted with 2 parts water).

3. Spray entire room with Kill Odor Plus™ and brush in if soil is also present.

4. Clean carpet using standard hot water extraction techniques.

5. Persistent areas may require a final application of Urine **Contamination Treatment™**

Hints and Tips

If an area of the room, such as a corner, is severely contaminated with urine, pull up the carpet and dispose of the underlay. Spray carpet, front and back, with Textile Rinse and then clean using standard hot water extraction techniques. Apply **Urine Contamination Treatment™** undiluted to carpet and floor. Install new underlay and reinstall the carpet when it has dried completely.

Urine Contamination Treatment Characteristics

pH Value:	6.5 – 7.5
Coverage:	Spot coverage variable.
Dilution:	Ready-to-use
Appearance:	Clear light yellow liquid
Fragrance:	Floral
Packaging:	Single 1L or case of 12
Re-order Code:	Single: UKURCT1L Case: URURCT12

PRE-TEST ALL AREAS TO BE TREATED
