## Service Through Innovation

“With 50 years’ experience, ICE is proud to be leading the market with a wide range of future friendly cleaning equipment solutions.

Our customer focused model, along with the innovative services and products we offer, continues to set the standards for our industry.”

# ICE VAC

Make & model of ICE Rental equipment may vary from machines shown

### ICE Vac Backpack

The ICE Vac Backpack is ideal for congested environments; its practical features allow for great advances in convenience cleaning.

Attention has been paid to user comfort, convenience and safety with an ergonomically designed, comfortable harness system.

The ICE Vac Backpack is lightweight and has a low noise level.

### ICE Vac Eco Tub

The ICE Vac Eco Tub is the most compact dry tub vacuum cleaner, suitable for a wide range of working environments.

This machine is lightweight allowing for easy transportation.

With one control this machine incorporates simplicity and power to create a practical high performance machine.

### ICE Vac Eco Tub R

The ICE Vac Eco Tub R is a commercial vacuum cleaner with a 12.5 metre cable, that has a rewind system on the head, allowing the operator to quickly and easily wind in the power cable after use.

The ICE Vac Eco Tub R has an eco-friendly motor and a 9 litre capacity.

### ICE Vac CTV

The ICE Vac CTV is a compact tub vacuum that offers great performance, excellent manoeuvrability and has an A energy rating.

Weighing only 6 Kg the CTV is light making it ideal for transporting between cleaning jobs.

The ICE Vac CTV has a 4-stage filtration system, that provides a high filtration of all particles of 0.3 microns and larger.

### ICE Vac Tub HEPA

The ICE Vac Tub HEPA is a rewind dry vacuum cleaner that provides powerful cleaning and up to 50% energy savings.

The unique plugged cable rewind system allows simple cable replacement if needed.

HepaFlo filtration not only raises performance standards, but also offers clean and convenient emptying when full.

### ICE Vac WD20

The ICE WD20 is the perfect wet and dry vacuum for cleaning small areas, such as offices and small workshops.

It is a professional vacuum cleaner with a powerful single motor.

This machine is extremely user friendly and easy to manoeuvre.

### ICE Vac WD40

The ICE WD40 is the perfect wet and dry vacuum for cleaning small and medium areas, such as offices, schools and workshops.

It is a professional vacuum cleaner with a powerful single motor.

This machine is extremely user friendly and easy to manoeuvre.

### ICE Vac WD60

The ICE WD60 is one of the largest wet and dry vacuums in the commercial range.

It is ideal for cleaning medium to large areas. It is a professional vacuum cleaner with a powerful motor to ensure excellent surface drying.

The ICE WD60 compatible with the SkyVac poles for specialist high level cleaning.

This machine is extremely user friendly and easy to manoeuvre.

### ICE Vac U 38

The ICE Vac U 38 is a tried and tested robust commercial twin motor upright vacuum cleaner.

The ICE Vac U 38 lays down completely horizontally for easy access under low furniture and beds.

The electronic overload control switches off the motor in case of excessive overload.

An extendible on board hose and extension wand are supplied as standard.

### ICE Vac U 45

The ICE Vac U 45 is a tried and tested robust commercial twin motor upright vacuum cleaner.

The ICE Vac U 45 lays down completely horizontally for easy access under low furniture and beds.

The electronic overload control switches off the motor in case of excessive overload.

The same in every way as the ICE Vac U 38 apart from the working width of the ICE Vac U 45 is 45cm meaning that has a higher productivity.

### ICE Vac Pro WAV

The ICE Vac Pro WAV is a hybrid upright vacuum cleaner, it can be used both with the on board battery or from a mains power point.

The WAV bag compartment is equipped with two comfortable handles for easy transportation and operation.

It can operate on any type of carpet, and has a wide body frame for easy access under tables. The brush roller and suction nozzle are quick to change without tools.

Some of the ideal environments for the Pro WAV are; large hotels, schools, medical facilities, airports, railway stations and shopping centres.

It comes complete with a full set of tools, the battery charger and the cord on board.

# ICE ON DEMAND

Make & model of ICE Rental equipment may vary from machines shown

### ICE BBV

The ICE BBV cordless backpack vacuum cleaner is suitable for a wide range of commercial vacuuming applications around office spaces, congested areas and busy pedestrian zones.

As the ICE BBV is powered by battery rather than a mains power supply, there are no wires to restrict access to anywhere, making it extremely versatile.

Worn like a back pack, this lightweight vacuum can go pretty much anywhere you can access.

### ICE BTV

The ICE BTV combines classic styling and quality with modern technology, performance and ergonomics.

This cordless cleaner, powered by a long lasting, high quality 36V Lithium Polymer battery, is a 'go anywhere' commercial vacuum, ideal for a wide range of medium to heavy duty cleaning tasks..

With no wires to restrict movement and featuring a handy top mounted handle, this lightweight vac can be used pretty much anywhere and is perfect for use on stairs and other difficult areas.

### ICE TVB

The ICE TVB is a professional model with all the exceptional user convenience, telescopic handle and 20cm soft ride transit wheels.

The integrated storage caddy for cleaning materials and can equally be the most convenient way of keeping a second battery on board, close at hand to extend the operation time.

The power head includes the on/off switch but, in addition, immediately alongside, sits a battery condition indicator which keeps you continually informed as to remaining run time.

### ICE Sweep

The ICE Sweep is a cordless sweeper that gives the same handiness of a broom, without the need to bend down to pick up the dirt. It is lightweight and robust, with a flexible joint to clean in all directions.

The sweeper is powered by a lithium-ion battery, which has a fast charge time, meaning the sweeper is always ready to use. It is a compact machine that can be stored in a 15 cm gap.

The sweeper is perfect for use in many environments such as in, small supermarkets and shops.

### ICE UBV

The ICE UBV is a battery powered dry vacuum cleaner; ideal daytime cleaning in nursing homes, offices and education facilities where power is not easily accessible or the use of corded machines poses a risk.

With a self-adjusting nozzle allowing the vacuum to float evenly over all flooring surfaces- no manual adjustments required by operator.

The ICE UBV lays flat on the floor for effective cleaning under beds or tables and is also fitted with a squeegee on the bottom of the vacuum to improve cleaning results on hard floors.

### ICE Mop

The ICE Mop is compact, lightweight and very easy to manoeuvre, plus it is powered by lithium-ion batteries for convenient rechargeable use.

Instead of pushing dirty water around with a mop and bucket, the ICE Mop uses clean water to vacuum and extract the dirt - leaving floors clean in an instant.

It can be used on any type of hard floor, and is ideal for areas such as kitchens, reception areas, shops and restaurants.

### ICE Scrub

The ICE Scrub is ideal for performing many short and targeted cleaning operations.

Thanks to the lithium-ion battery, it can be quickly charged and ready to use as often as you wish. The machine is small and lightweight, and cleans in even the smallest spaces. It is compact, and very easy to store.

The ICE Scrub is ideal for restaurants and shops, and can even be used for cleaning during business hours.

### ICE Mop +

The ICE Mop + is an extremely small and compact machine.

It is small but strong - the stainless steel chassis and with a 41 cm working width.

With a 3 litre capacity and a productivity of 1,200m<sup>2</sup>/hr.

This machine is ideal for the cleaning of small spaces with lots of obstacles. Thanks to its liftable squeegee blade it can be used for dewaxing and polishing treatments.

### ICE Trolley 4.0

The ICE Trolley 4.0 is our small janitorial trolley with 2 storage buckets and waste bin.

The ICE Trolley 4.0 can house the ICE Sweep, Pulse Mop and a dustpan & brush.

This trolley is ideal for offices, schools and corporate hospitality venues.

The ability to deliver consistent levels of cleaning throughout the site opening hours is now a major strategy and a key driver for cleanliness and customer experience.

### ICE Trolley 5.0

The ICE Trolley 5.0 is our medium janitorial trolley with storage cupboard, 1 cleaners bucket and waste bin.

The ICE Trolley 5.0 can house the ICE Sweep, ICE Mop and a dustpan & brush.

This trolley is ideal for offices, retail and small to medium railway/service stations.

The ability to deliver consistent levels of cleaning throughout the site opening hours is now a major strategy and a key driver for cleanliness and customer experience.

### ICE Trolley 6.0

The ICE Trolley 6.0 is our large janitorial trolley with a lockable storage cupboard, 3 colour coded cleaners bucket and waste bin.

The ICE Trolley 6.0 can house the ICE Sweep, ICE Mop and a dustpan & brush.

This trolley is ideal for large shopping centres, airports, large railway/service stations and healthcare environments.

The ability to deliver consistent levels of cleaning throughout the site opening hours is now a major strategy and a key driver for cleanliness and customer experience.

# ICE ECO DISC

Make & model of ICE Rental equipment may vary from machines shown

### ICE Eco Disc Compact B

ICE Eco Disc Compact B is battery operated 20 cm single disc scrubbing machine. Ideal for cleaning all those hard to reach areas.

The best places to use the ICE Eco Disc Compact B are stair cleaning, washrooms/toilets, floors and walls within hospitals, vehicle cleaning and stainless steel buffing.

It has been designed for safe and reliable use, and with a run time of 4 hours it is the ultimate compact scrubbing machine.

### ICE Eco Disc Mini

The ICE Eco Disc Mini is a versatile oscillating pad machine that weighs only 13 kg. It can be used to clean carpets and hard floors with the bonnet pads or alternatively used for agitation of pre-spray using the available brushes and pads.

Like all oscillating pad machines, the ICE Eco Disc Mini is very easy to control but, this machine incorporates an anti-vibration system that makes for even smoother operation.

Extremely easy to use the ICE Eco Disc Mini has an oscillating pad drive which operates at 1,450 rpm enabling efficient floor polishing and cleaning.

### ICE Eco Disc 200

The ICE Eco Disc 200 is a 240-volt standard speed single disc rotary machine designed for cleaning and scrubbing medium sized areas of floor.

Operating at only 53 decibels, the machine can be fitted into normal working patterns without causing disruption.

The ICE Eco Disc 200 is the ideal machine for the scrubbing of small areas.

It is a lightweight, easy to use, ergonomic machine with low level vibrations offering optimum operator comfort.

### ICE Eco Disc 400

The ICE Eco Disc 400 is a high speed single disc rotary machine designed for cleaning and scrubbing medium sized areas of floor.

Operating at only 53 decibels, the machine can be fitted into normal working patterns without causing disruption.

The ICE Eco Disc 400 is the ideal machine for the polishing and buffing of small areas.

It is a lightweight, easy to use, ergonomic machine with low level vibrations offering optimum operator comfort. It has a powerful motor system and high pad/brush pressure for effective cleaning.

### ICE Eco Disc Duo

The ICE Eco Disc Duo is a twin speed single disc rotary machine designed for scrubbing, stripping, spray cleaning and polishing.

Operating at only 53 decibels, the machine can be fitted into normal working patterns without causing disruption.

The ICE Eco Disc Duo combines both the ICE Eco Disc 200 & 400 making it a versatile machine and ideal for both scrubbing and buffing floors.

It is a lightweight, easy to use, ergonomic machine with low level vibrations offering optimum operator comfort. It has a powerful motor system and high pad/brush pressure for effective cleaning.

### ICE Eco Disc UHS

The ICE Eco Disc UHS is an ultra high speed single disc rotary machine designed for spray buffing and burnishing.

It has a powerful motor system and its high 1,500rpm speed cleans and polishes hard floors, resulting in maximum gloss and shine.

Operating at only 56 decibels, the machine can be fitted into normal working patterns without causing disruption.

It is a lightweight, easy to use, ergonomic machine with low level vibrations, offering optimum operator comfort.

### ICE Eco Disc UHS B

The ICE Eco Disc UHS B is an ultra high speed battery powered rotary burnisher ideal for daytime cleaning when customers, staff or patients are present.

Its high 1,500rpm speed cleans and polishes hard floors resulting in maximum gloss and shine.

Its cordless operation and low 56.6 decibels noise level means that the machine can be fitted into normal working patterns without causing disruption.

It is a lightweight, easy to use, ergonomic machine with low vibrations offering optimum operator comfort.

# ICE CARPET CARE

Make & model of ICE Rental equipment may vary from machines shown

### ICE C-Care 300

The ICE C-Care 300 is a deceptively robust and highly effective carpet and upholstery cleaner.

It is largely used in nursing homes, hospitals and hotels, but can equally lend itself to many other applications.

The ICE C-Care 300 is so light that it ensures ease of use for all operators.

| Specification          | ICE C-Care 300 |
|------------------------|----------------|
| Fresh water capacity   | 7 Ltr          |
| Dirty water capacity   | 7 Ltr          |
| Pump pressure          | 2 bar          |
| Airflow capacity       | 50 ltr/sec     |
| Cable length           | 7.5 m          |
| Power                  | 1,000 W        |
| Weight                 | 9.5 Kg         |
| Airflow capacity       | 54 l/sec       |
| Dimensions (L x W x H) | 40x40x52 cm    |

### ICE C-Care 411

The ICE C-Care 411 is a spray extraction machine for textile surfaces such as carpets, upholstery or car interiors.

Thanks to the compact and lightweight construction it is ideal for basic cleaning of small to medium sized surfaces.

The easily removable dirty water tank allows for efficient operation. The powerful suction results in a fast-dried surface, and the optional hard floor adapter allows cleaning of stone and other hard floors.

| Specification          | ICE C-Care 411 |
|------------------------|----------------|
| Fresh water capacity   | 10.5 Ltr       |
| Dirty water capacity   | 9 Ltr          |
| Pump pressure          | 2.4 bar        |
| Airflow capacity       | 54 ltr/sec     |
| Cable length           | 7.5 m          |
| Power                  | 1,200 W        |
| Weight                 | 14 Kg          |
| Airflow capacity       | 54 l/sec       |
| Dimensions (L x W x H) | 65x32.5x44 cm  |

### ICE C-Care 1250

The ICE C-Care 1250 is a heavy duty spray extraction machine with a high suction performance for the professional cleaning of large areas.

This compact yet robust machine has a fully adjustable spray pressure from 2 - 11 bar.

| Specification          | ICE C-Care 1250 |
|------------------------|-----------------|
| Fresh water capacity   | 35 Ltr          |
| Dirty water capacity   | 40 Ltr          |
| Pump pressure          | 2-11 bar        |
| Airflow capacity       | 60 ltr/sec      |
| Cable length           | 20 m            |
| Power                  | 1,700 W         |
| Weight                 | 39 Kg           |
| Airflow capacity       | 60 l/sec        |
| Dimensions (L x W x H) | 82x41x184 cm    |

### ICE C-Care Compact

The ICE C-Care Compact offers forwards and backwards carpet cleaning with brush action, making it the ideal choice for professional cleaning of large areas.

The ICE C-Care Compact can also clean corners, edges, upholstery and stairs with its attachable adaptors.

| Specification          | ICE C-Care Compact |
|------------------------|--------------------|
| Fresh water capacity   | 35 Ltr             |
| Dirty water capacity   | 40 Ltr             |
| Pump pressure          | 5 bar              |
| Airflow capacity       | 60 ltr/sec         |
| Cable length           | 20 m               |
| Power                  | 1,600 W            |
| Weight                 | 45 Kg              |
| Airflow capacity       | 60 l/sec           |
| Dimensions (L x W x H) | 100x45x93 cm       |

# ICE STEAM

Make & model of ICE Rental equipment may vary from machines shown

### ICE Steam Gum Mini

The ICE Steam Gum Mini can remove chewing gum in matter of seconds.

The carbon fibre lance has a built in gas-powered burner, which vaporises the unique, environmentally friendly cleaning chemical.

The backpack is worn by the operative and this contains the LPG, unique gum removal chemical, rechargeable battery and pump.

### ICE Steam Gum Maxi

The ICE Steam Gum Maxi eliminates the need for high pressure hoses, unfriendly chemicals and over-spray into unwanted spaces, whilst removing chewing gum in matter of seconds.

This makes it highly suitable for work in populated, busy areas.

The high quality and robust design of the ICE Steam Gum Maxi means it has a continuous operating cycle of up to 12 hours.

### ICE Steam GB1

The innovative ICE Steam GB1 requires no cables, no generators and the unique 10 ltr pre mixed chemical/ water tank, which will last an entire shift.

The ICE Steam GB1 busts through unsightly gum deposits effortlessly and in a matter of seconds. With its self contained unit, it can be used during the day and in densely populated areas as required.

The ICE Steam GB1 will operate for an impressive 6 hours from one battery charge, the only machine of its type to do so.

### ICE Steam 4.5

The ICE Steam 4.5 is a commercial/industrial 4.5 bar pressure steam cleaning machine.

It is made from a stainless-steel construction, featuring a continuous fill boiler system allowing refill at any time during operation.

High temperature steam penetrates deep into surfaces, sanitising and killing bacteria in a wide variety of commercial environments.

### ICE Steam + Vac 4.5

The ICE Steam 4.5 is a commercial/industrial 4.5 bar pressure steam cleaning machine.

It is made from a stainless-steel construction, featuring a continuous fill boiler system allowing refill at any time during operation.

The ICE Steam 4.5 comes with an integral vacuum system.

High temperature steam penetrates deep into surfaces, sanitising and killing bacteria in a wide variety of commercial environments, and the integral vacuum ensures surfaces are left clean and dry.

### ICE Steam + Vac 8

The ICE Steam + Vac 8 is a commercial/industrial 8 bar pressure steam cleaning machine incorporating a chemical delivery system.

A stainless steel construction offers great durability, and the device features a continuous fill boiler system, allowing refill at anytime during operation.

The ICE Steam+ Vac 8 comes with an integral vacuum system.

High temperature steam penetrates deep into surfaces sanitising and killing bacteria in a wide variety of commercial environments and the integral vacuum ensures surfaces are left clean & dry.

## ICE Steam GR8888

The ICE Steam + Vac GR8888 is a completely self-contained chewing gum removal system, incorporating a 8 bar pressure steam boiler with an integral chemical delivery system.

It comes as a complete unit comprising of a dual voltage generator, steam machine, trolley & storage. The trolley is made from a durable powder coated steel construction.

The system features a continuous fill boiler allowing refill at any time during operation.

Ideally suited for external large areas of chewing gum removal.

| Specification          | ICE Steam GB1    | ICE Steam 4.5 |

| ICE Steam Gum Mini  |
|---|
| 4 hour run time   |
| Custom made soft case and harness   |
| Easy access zipped compartment for detergent and gas                              |
| Over the shoulder remote with:  |
| All controls in the operators hand  |
| Visible battery level indicator   |
| Push fit fittings for lance connection to main body for easy removal and service. |
| Improved safety systems to ensure machine does not overheat                       |

| ICE Steam Gum Maxi   |
|--|
| 8 Hour run time  |
| Completely silent - cleaning can be carried out at night   |
| Portable and safe  |
| Environmentally friendly - cleaning solution manufactured from renewable sources, and is completely bio-degradable |
| No moving parts = no servicing costs or replacement parts required   |
| Hand held control unit   |
| No external power source required  |

# ICE ESC-CLEAN

Make & model of ICE Rental equipment may vary from machines shown

### ICE Esc Mop

The ICE Esc Mop escalator cleaning system is designed as a daily or regular cleaning system and cleans any brand, size or style of escalator or travelator in minutes, not hours.

The cost is very low compared to traditional methods of cleaning escalators and far quicker.

The ICE Esc Mop escalator cleaning system can be used to clean escalators and travelators in airports, shopping centres, office buildings and other commercial environments without the need of power or skilled operatives.

### ICE Multiwash

The ICE Multiwash is highly effective on 'difficult' floors, including non-slip safety floors, escalators/travelators, low pile carpets and entrance matting.

It is a multi-purpose floor cleaning machine that washes, mops, scrubs and dries hard and soft floors.

It is a quiet, high-speed machine with a choice of brushes for maintenance or intensive cleaning. It has accessible and removable tanks for fast filling and emptying, and leaves floors ready to walk on in minutes.

### ICE X46

The ICE X46 escalator cleaner features powerful rotating brushes which loosens any dirt, and removes stains and grime.

It has twin vacuum motors which instantly sucks up the dirt leaving escalators clean, as well as automatic brush height adjustment to allow use for various applications.

The ICE X46 is designed to help reduce operating costs and dramatically improve the appearance of your travelator/escalator.

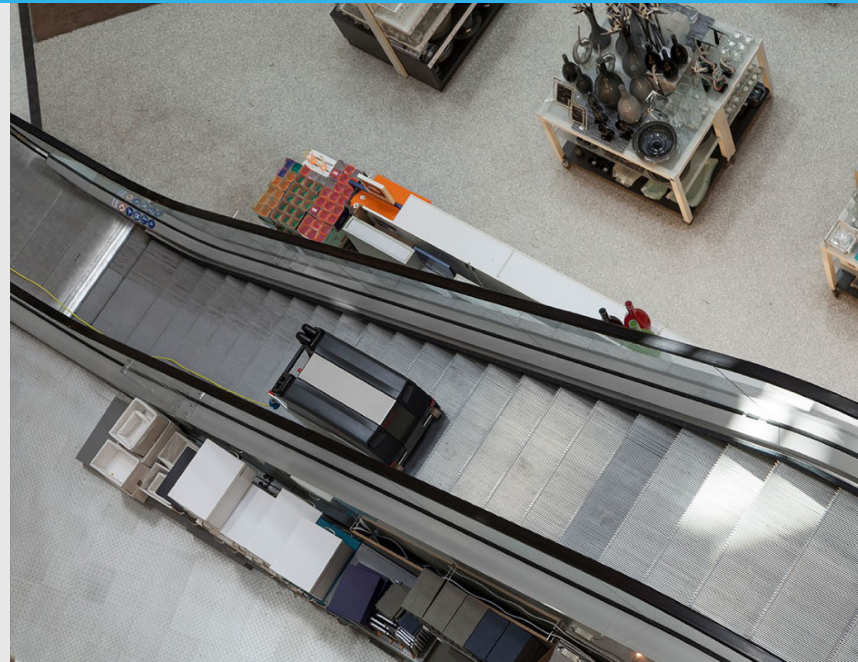

## ICE T600

The ICE T600 is compact and cleans automatic travelators quickly, thoroughly and close to the edge when the travelator is in operation. An optimum cleaning result is achieved thanks to the special counter-rotating brushes combined with the patented extractor unit.

The ICE T600 can clean both travelator and the steps of escalators. The powerful integrated extractor unit prevents detergent dripping into the travelator shaft (electrical and mechanical system) therefore enabling a safe, gentle clean without residue.

The ICE T600 cleans close to the edge and can therefore also clean the normally difficult to clean edge areas of travelators of all well-known manufacturers.

## ICE E100

The ICE E100 cleans the treads and rises, reliably, visibly and thoroughly in one step- without leaving any residue. This machine is compact and robust, with a built-in water tank that can be easily transported and operated by a single person.

3 cleaning cycles, suitable for many different degrees of soiling, are already programmed in. These can be chosen using a selector switch. The usage of water and cleaning chemicals can be dosed sparingly, making environmentally friendly and sustainable cleaning possible.

Due to the optimal adjustment to the step height, no water gets into the escalator, and a convincing cleaning performance is ensured. This is why the ICE E100 can universally clean escalators of different heights and manufacturers. Once adjusted to an escalator type, ICE E100 cleans it literally step by step.

The centre of gravity of the ICE E100 is intentionally placed in the front. This is why the ICE E100 rests securely on the escalator.

Through the combination of the easy adjustment of the step height and the activated brake, the ICE E100 is secured against falling down from the escalator.

| Specification          | ICE Multiwash   | ICE X46     | ICE T600             | ICE E100              |

# ICE WASH

Make & model of ICE Rental equipment may vary from machines shown

### ICE Wash Compact C

The ICE Wash Compact C is a compact cold water pressure washer that combines high performance, ergonomics, and durability for superior everyday cleaning.

It is suitable for low intensity use and light industrial routine cleaning tasks.

The machine offers excellent cleaning performance, professional spray equipment, easy to store and to transport.

### ICE Wash Compact H

The ICE Wash Compact H is an innovative compact hot water unit with a unique vertical design, high performance and is extremely reliable. It is ideal for every day cleaning tasks and is the perfect choice for tradesmen, small building companies, garages and farms.

It ensures a low cost of cleaning with reduced running costs, low storage requirements (due to the compact design), and highly reliable thanks to the many safety functions and professional materials used.

### ICE Wash Industrial C

ICE Wash Industrial C is designed for light, general cleaning tasks and is the ideal choice for tradesmen, small building companies & small garages. It is equipped with a professional 1,450 rpm motor pump unit with ceramic coated pistons, developed for low to medium intensity use.

The ICE Wash Industrial C is equipped with a turnable hook, which makes it simple to wind and unwind the electrical cable, reducing the hassle linked to preparation or storage of the machine. .

## ICE Wash Industrial H

The ICE Wash Industrial H is a mid-range hot water high pressure washer that meets with the latest productivity demands in the market.

It is equipped with an industrial NA5 pump with 3 ceramic pistons and a high efficiency 4 pole motor. The flow activated control system improves user comfort and handling as well as overall machine reliability.

The ICE Wash Industrial H is suited for all hot water heavier cleaning applications, and can be used for up to 6 hours per day. Service and maintenance can be carried out quickly, as all vital parts are easy to inspect and reach.

## ICE Wash Trailer

The ICE Wash Trailer mounted hot bowser pressure washer is designed to clean where neither power nor water supply is available.

The unit is mounted in a galvanised trailer and bodywork to prevent corrosion.

The steam generator is driven by a diesel engine and fitted with an electric start and easy to use control panel.

# ICE SCRUB

Make & model of ICE Rental equipment may vary from machines shown

### ICE Scrub 35 D

The ICE Scrub 35 D is a small-sized scrubbing machine, ideal for the cleaning of smooth flooring. It can clean in corners and along walls with extreme ease.

This battery powered machine is cable-free for best manoeuvrability in small and congested areas.

It comes with a built-in battery charger and gel batteries as standard.

The ICE Scrub 35 D is ideal for small congested areas and is a great alternative to manual cleaning systems such as the mop and bucket.

### ICE Scrub 35 C

The ICE Scrub 35 C is a small-sized scrubbing machine, which can clean up in corners and along walls with extreme ease. Suited to profiled floor surfaces.

This battery-powered machine is cable-free for best manoeuvrability in small and congested areas.

It comes with a built-in battery charger and gel batteries as standard.

The ICE Scrub 35 C is ideal for small congested areas and is a great alternative to manual cleaning systems such as the mop and bucket.

### ICE Scrub 40 D

The ICE Scrub 40 D is the ideal scrubber dryer for all medium sized hard floor areas.

It has a good productivity rate combined with excellent cleaning performance, in a compact and manoeuvrable machine.

The adjustable handle height is ideal for operator comfort.

Due to the size of the ICE Scrub 40 D it is easily stored and can be used easy in small and congested areas.

### ICE Scrub 43 D

The ICE Scrub 43 D is a tough scrubbing machine that is ideal for mid-sized floor spaces in business and industry.

Optimum cleaning results are achieved through the machines' high brush pressure.

The large wheels on the machine ensure no vibration occurs making it comfortable for the operator and the machine is able to cope well with obstacles.

### ICE Scrub 50 D

The ICE Scrub 50 D is a battery powered walk behind scrubbing machine, offering high performance for both maintenance and heavy duty cleaning.

The ICE Scrub 50 D is extremely versatile thanks to its compact size, and it is ideal to meet the cleaning needs across a variety of sectors, ideally suited to smooth floor types.

Full accessibility to components allows for easy maintenance.

### ICE Scrub 50 C

The ICE Scrub 50 C is a battery powered walk behind scrubbing machine, offering high performance for both maintenance and heavy duty cleaning of profiled surfaces.

The ICE Scrub 50 C is extremely versatile thanks to its compact size, and it is ideal to meet the cleaning needs across a variety of sectors.

Full accessibility to components allows for easy maintenance.

### ICE Scrub 50 O

The ICE Scrub 50 O is a battery powered walk behind scrubbing machine, offering high performance for both maintenance and heavy duty cleaning.

The ICE Scrub 50 O is extremely versatile thanks to its compact size, and it is ideal to meet the cleaning needs across a variety of sectors.

This oscillating machine can easily clean corners and edges thanks to the square pad, and will also provide a deeper clean than a disc or cylindrical machine.

Full accessibility to components allows for easy maintenance.

### ICE Scrub 55 D

The ICE Scrub 55 D is a battery powered walk behind scrubber dryer with automatic traction, with a 55 cm working width.

It has a good productivity rate combined with excellent cleaning performance, in a compact and manoeuvrable machine.

The brush head, squeegee attachment and frame made of die-cast aluminium make the machine robust and reliable, as well as lightweight and comfortable both during transportation and operation.

### ICE Scrub 60 C

The ICE Scrub 60 C is a battery powered scrubber dryer with cylindrical brushes, with a working width of 61 cm.

The ICE Scrub 60 C is a scrubbing machine that is suitable for maintenance and deep-cleaning in large areas where the utmost discretion is required during cleaning operations.

This machine is best suited to profiled surfaces.

### ICE Scrub 65 D

The ICE Scrub 65 D is a battery powered walk behind scrubber dryer with automatic traction, with a 65 cm working width.

It has a high productivity rate combined with excellent cleaning performance, in a compact and manoeuvrable machine.

The brush head, squeegee attachment and frame made of die-cast aluminium make the machine robust and reliable, as well as lightweight and comfortable both during transportation and operation.

### ICE Scrub 75

The ICE Scrub 75 is a pedestrian scrubber dryer suitable for maintenance and deep cleaning of large areas where the utmost discretion is required during cleaning operations.

Thanks to its low noise levels it is ideal for environments such as nursing homes and hospitals, or in retail outlets for day time cleaning.

The traction is driven by two small levers near the handle, so the speed can be controlled at all times.

### ICE Scrub 82

The ICE Scrub 82 is suitable for deep cleaning and maintenance of medium to large industrial areas.

The strong mechanical structure and the high performance of its 36-Volt components can endure long cleaning sessions, and work on demanding surfaces.

Its batteries are easily accessible, simply by lifting the hinged solution tank.

The controls are intuitive and easy to use, and the machine has a productivity rate of up to 3,320 square metres per hour.

| Specification          | ICE Scrub 35 D           | ICE Scrub 35 C         | ICE Scrub 40 D           | ICE Scrub 43             | ICE Scrub 50 D           | ICE Scrub 50 C           |

# ICE R SCRUB

Make & model of ICE Rental equipment may vary from machines shown

### ICE R Scrub 55

The ICE R Scrub 55 is a compact ride on scrubber dryer, with a productivity rate of up to 3,000 square metres per hour.

Thanks to its compact dimensions, it is able to perform well in small spaces, moving easily around obstacles to complete cleaning operations in a shorter time than a walk behind scrubber dryer.

### ICE R Scrub 75 D

The ICE R Scrub 75 D is an advanced scrubber dryer that makes cleaning interactive and easy.

It is ideal for small to medium size areas due to its compact size.

It is versatile, and is perfect for environments such as supermarkets, warehouses, shopping malls, production sites and service areas.

### ICE R Scrub 85 D

The ICE R Scrub 85 D is a highly user-friendly scrubbing machine suitable for maintenance cleaning of hard floor surfaces up to 5,100 square metres per hour, which allows a dramatic reduction in the cost of cleaning.

The ICE R Scrub 85 D offers the economic advantage to be used up to four non-stop working hours thanks to the optimisation of energy consumption.

The compact size allows the machine to pass even through traditional doors or be transported in lifts.

### ICE R Scrub 90 D

ICE R Scrub 90 D is a ride on scrubber dryer with a robust design, suitable for working in many environments up to 15,000 square metres.

It gives outstanding results, even providing the deep cleaning of various hard floors such as warehouses, logistic centers.

The large tank capacity increases productivity, while quiet operation means it can be used during the daytime without disturbing people.

### ICE R Scrub 90 C

ICE R Scrub 90 C is a ride on scrubber dryer with a robust design, suitable for working in many environments up to 15,000 square metres.

It gives outstanding results, even providing the deep cleaning of various profiled surfaces.

The large tank capacity increases productivity, while quiet operation means it can be used during the daytime without disturbing people.

### ICE R Scrub Ultra D

The ICE R Scrub Ultra D is compact in size and innovative in design.

This machine is suitable for maintenance cleaning of medium to large size working, industrial or service areas in general.

With a productivity rate of up to 6,500 square metres per hour and an excellent productivity, this machine is extremely effective and economical.

### ICE R Scrub Ultra C

The ICE R Scrub Ultra C is compact in size and innovative in design, ideal for the use on profiled surfaces.

This machine is suitable for maintenance cleaning of medium to large size working, industrial or service areas.

With a productivity rate of up to 6,500 square metres per hour and an excellent operating autonomy, this machine is extremely effective and economical.

### ICE R Scrub 1250

The ICE R Scrub 1250 is perfect for multiple floor cleaning needs as it can sweep, scrub and dry in a single pass. It can also be used for single purpose cleaning depending on the requirement.

The tank capacity is larger than any other comparable machine, providing longer running time, high productivity and lower cleaning costs.

Maintenance has never been easier thanks to the no tools service access points.

### ICE Combination 114

The ICE Combination 114 is a large capacity scrubber sweeper that gives exceptional cleaning results whilst providing the lowest cost of ownership by cleaning in a single pass.

The machine has unrivalled productivity rates, gives an unbeatable cleaning performance, and the robust design features mean that the ICE Combination 114 is the most robust and reliable machine on the market.

### ICE Combination 114 HD

The ICE Combination 114 HD is a large capacity scrubber sweeper that gives exceptional cleaning results whilst providing the lowest cost of ownership by cleaning in a single pass.

The machine has unrivalled productivity rates, gives an unbeatable cleaning performance, and the robust design features mean that the ICE Combination 114 HD is the most robust and reliable machine on the market.

The hydraulic dumping system ensures that the emptying of the hopper is the easiest it could be for the operator.

### ICE Combination 82

ICE Combination 82 is a sweeper scrubber with a powerful scrubbing ability, which pre-sweeps at the same time as deep cleaning.

It has an all-steel construction, meaning that it has been built to withstand tough, industrial environments.

Easy access to the engine makes maintenance and service repair simple.

# ICE SWEEP

Make & model of ICE Rental equipment may vary from machines shown

### ICE Sweep Litter Vac

The ICE Sweep Litter Vac is a battery powered leaf and litter vacuum that has been designed to provide a high performance using its unique suction vacuum to handle stubborn areas of collection.

The ICE Sweep Litter Vac has a turbine wheel that generates air flow for an extremely powerful suction process.

### ICE Sweep 50

The ICE Sweep 50 is a compact walk behind sweeping machine with a working width of 65 cm.

Cleaning corners and along walls is easy thanks to the side brush.

The handle bar grip is made of comfortable material allowing for ease of use for operators.

This machine is available in either battery or petrol.

### ICE R Sweep 60

The ICE R Sweep 60 is a ride on sweeping machine suitable for both indoor and outdoor spaces.

It has a working width of 60 cm when using the central brush, and 100 cm with 2 side brushes (optional).

It is comfortable, easy to manoeuvre and guarantees excellent cleaning results even on carpet floors.

This machine is available in either battery or hybrid.

## ICE R Sweep 70

The ICE R Sweep 70 is a sweeping machine suitable for commercial and industrial cleaning of surfaces up to 10,000 square metres.

It is a ride on sweeper with automatic traction, and is powered by either battery or petrol motor.

It has a 70 cm working width when using the central brush, or 112 cm with the two optional side brushes.

## ICE R Sweep 80

The ICE R Sweep 80 is a sweeping machine that is suitable for cleaning the most resistant dirt on both indoor and outdoor surfaces.

It is ideal for spaces of up to 20,000 square metres, as well as small, narrow or cluttered areas, thanks to the box frame built around the centre brush which is very compact but also extremely robust.

To guarantee maximum driving comfort for the operator, and maximum reliability, all the main functions are hydraulic.

## ICE R Sweep 100

The ICE R Sweep 100 is suitable for cleaning the most resistant dirt on outdoor and indoor surfaces such as; department stores and car parks up to 30,000 square metres.

The ICE R Sweep 100 has been designed to easily collect solid debris and both light and heavy dust.

The controls are all hydraulic, ensuring they are reliable and easy for the operator to use.

### ICE R Sweep 130

The ICE R Sweep 130 is a highly manoeuvrable compact machine that can handle even the most demanding sweeping requirements.

It has 360° engine access, which is ideal for routine maintenance - saving time and providing longer engine life. The ICE R Sweep 130 provides unbeatable performance in the toughest environments.

The operator friendly design also means that the machine leads the way in safety for the customer, operator and employees.

### ICE R Sweep 6X

The ICE R Sweep 6X is a quality, cost effective sweeper that will provide years of consistently reliable service.

Manufactured to a heavy-equipment design criteria, it meets the most rigorous of cleaning requirements.

The ICE R Sweep 6X is a truly rebuildable sweeper, much like forklift trucks, this means a longer life than most conventional sweepers.

# ICE URBAN

Make & model of ICE Rental equipment may vary from machines shown

### ICE Urban 2150

The ICE Urban 2150 is a versatile and compact machine that enables easy access to narrow areas. It is easy to manoeuvre and offers a powerful 28 HP performance with 4-wheel drive.

The suction sweeper unit gives high suction power performance, ensuring fast and efficient cleaning results. It features a fibreglass high-dump hopper and a rotation-cast water tank.

The machine has a low overall height and can enter any parking facility. The remote vacuum hose makes it possible to clean where the machine cannot go e.g. basements and stairs.

### ICE Urban 2250 2

The ICE Urban 2250 2 is a complete suction sweeper unit offering professional performance, flexibility and accessibility to narrow spaces in all tasks.

It comes with 2 brushes, and is available with or without high pressure cleaner attachment.

The ICE Urban 2250 2 can have the following attachments added; snow plough, gritter and weed extraction. This means that this machine is ideal for all weather purposes.

### ICE Urban 2250 3

The ICE Urban 2250 3 is a complete suction sweeper unit offering professional performance, flexibility and accessibility to narrow spaces in all tasks.

The additional brush extends the working width of the machine and means that both the road and pavement is able to be cleaned simultaneously.

It comes with 3 brushes, and is available with or without high pressure cleaner attachment.

The ICE Urban 2250 3 can have the following attachments added; snow plough, gritter and weed extraction. This means that this machine is ideal for all weather purposes.

### ICE Urban 2250 4

The ICE Urban 2250 4 is a complete suction sweeper unit offering professional performance, flexibility and accessibility to narrow spaces in all tasks.

The additional brush extends the working width of the machine and means that both the road and pavement is able to be cleaned simultaneously.

It comes with 4 brushes, and is available with or without high pressure cleaner attachment.

The ICE Urban 2250 4 can have the following attachments added; snow plough, gritter and weed extraction. This means that this machine is ideal for all weather purposes.

### ICE Urban 3500

The ICE Urban 3500 creates perfect sweeping results. Ideal for town centres, pavements, streets and paths are all left sparkling clean after the ICE Urban 3500 has finished. The unique hose routing ensures a very suction performance and energy-saving operation.

The brushes on the ICE Urban 3500 can be used independently. This high manoeuvrability allows the operator to easily sweep around pylons, street furniture and in car parks.

The ICE Urban 3500 is equipped with a water recycling system, radically decreasing water consumption and extending operating time between each water supply. The capacity is naturally variable according to the type of dirt.

| Specification          | ICE Urban 2150            | ICE Urban 2250 2B         | ICE Urban 2250 3          |

# ICE MTECH

Make & model of ICE Rental equipment may vary from machines shown

## ICE Robo 3

The ICE Robo 3 is the most advanced fully autonomous cleaning machine in the world. It is the only machine of its kind that will clean complex areas, thanks to its unique laser and sensor technology.

It offers unlimited cleaning patterns that can be mapped in one minute, and consistent cleaning right up to the edge, and out-performs any other robotic machine when cleaning tight corners, edges and complex rooms.

The Robo 3 is ideal for a wide range of environments. The quick change battery system has doubled the run time of the ICE Robo 3. Using its sonic bumper sensors and unique laser radar, the Robo 3 completely avoids static, temporary or moving obstacles. With a countdown time to set a start time Robo 3 can be set up and ready to clean the previous shift. It will return to clean any areas that have been missed due to temporary obstacles being placed within the cleaning area.

### ICE MTech 50 D

The ICE MTech 50 D is a sturdy scrubbing machine built with the best components and a striking design. Refined engineering combined with high quality materials has led to a model made to last, reliable and able to reduce the total cost of ownership.

The operator is the centre of a high-tech universe, where everything is easy, intuitive and dynamic thanks to the touch screen control panel.

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customisable features to satisfy all types of requirements with extreme simplicity configurations.

### ICE MTech 50 C

The ICE MTech 50 C is a sturdy scrubbing machine built with the best components and a striking design. Refined engineering combined with high quality materials has led to a model made to last, reliable and able to reduce the total cost of ownership.

The operator is the centre of a high-tech universe, where everything is easy, intuitive and dynamic thanks to the touch screen control panel.

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customisable features to satisfy all types of requirements with extreme simplicity configurations.

### ICE MTech 50 O

The ICE MTech 50 O is a sturdy scrubbing machine built with the best components and a striking design. Refined engineering combined with high quality materials has led to a model made to last, reliable and able to reduce the total cost of ownership.

The operator is the centre of a high-tech universe, where everything is easy, intuitive and dynamic thanks to the touch screen control panel.

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customisable features to satisfy all types of requirements with extreme simplicity configurations.

### ICE MTech 60 D

The ICE MTech 60 D is a sturdy scrubbing machine built with the best components and a striking design. Refined engineering combined with high quality materials has led to a model made to last, reliable and able to reduce the total cost of ownership.

The operator is the centre of a high-tech universe, where everything is easy, intuitive and dynamic.

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customisable features to satisfy all types of requirements with extreme simplicity, configurations.

### ICE MTech 70 D

The ICE MTech 70 D scrubbing machine is the ideal solution for those who look for a machine with low maintenance costs and high productivity.

The ICE MTech 70 D offers great working autonomy, by up to 4 hours, guaranteed by the Eco Mode device that activates a working condition that optimizes energy, water and detergent consumptions, ensuring low using costs.

The ICE MTech 70 D is equipped with a large handle bar giving ergonomics and manoeuvrability as well as ensuring the maximum safety while working.

## ICE MTech R 75

The ICE MTech R 75 is an advanced, technological scrubbing machine that makes cleaning intelligent, interactive and easy. The most innovative solutions are used to get the best results and benefits in small to medium areas.

The design provides comfort and safety during use and highlights the quality of the product.

The ICE MTech R 75 perfectly embodies Industry 4.0 principles, for its connectivity, combination of technological innovations, and smart design. The telemetry software lets the ICE MTech R 75 communicate with you, anytime you want.

Thanks to the iD system the operator can interact in a very different way, through a touchscreen display. Everything becomes as intuitive, fast and easy, as using a smartphone.

The ICE MTech R 75 is available in disc, cylindrical and orbital models.

ICE Rental is the industry's most flexible and comprehensive equipment rental model, giving access to a whole range of innovative equipment without the requirement for capital spend.

It is fully flexible, and designed to expand and contract with your contract wins and losses, minimising risks associated with traditional equipment purchasing.

The fully inclusive model fixes costs, ensuring that you can budget accordingly. Service is carried out by our highly skilled Service Engineers situated across the UK and Ireland, or vacuum cleaners can be swapped out using 'Switch'.

All assets are managed through our bespoke asset management system, ensuring full visibility and reporting of both your fleet of equipment and costs.

You can also rest assured that all your sites are compliant, with PA testing carried out and recorded on our system - all included within the cost.

### Advantages of ICE Rental

- ✓ Flexy charge to expand with wins and losses
- ✓ No capital outlay
- ✓ Off balance sheet' rental
- ✓ Service Support - on-site or SWITCH
- ✓ New equipment across portfolio
- ✓ New equipment on all new contract wins
- ✓ Fixed cost - fully inclusive
- ✓ Full asset management & compliance
- ✓ Detailed Management Information
- ✓ Manage all assets using our online system
- ✓ Buy-back of existing legacy equipment
- ✓ Full on-site training & support

All equipment is delivered, and your staff will be fully trained by our dedicated training team. Top up training is available free of charge throughout, and instant training requirements are supported through the ICE Training App.

We also offer to 'buy-back' your existing assets at net book value, giving the opportunity to move all your equipment management onto the ICE Rental model and taking assets off the balance sheet.

**SMARTLY CONNECTED**

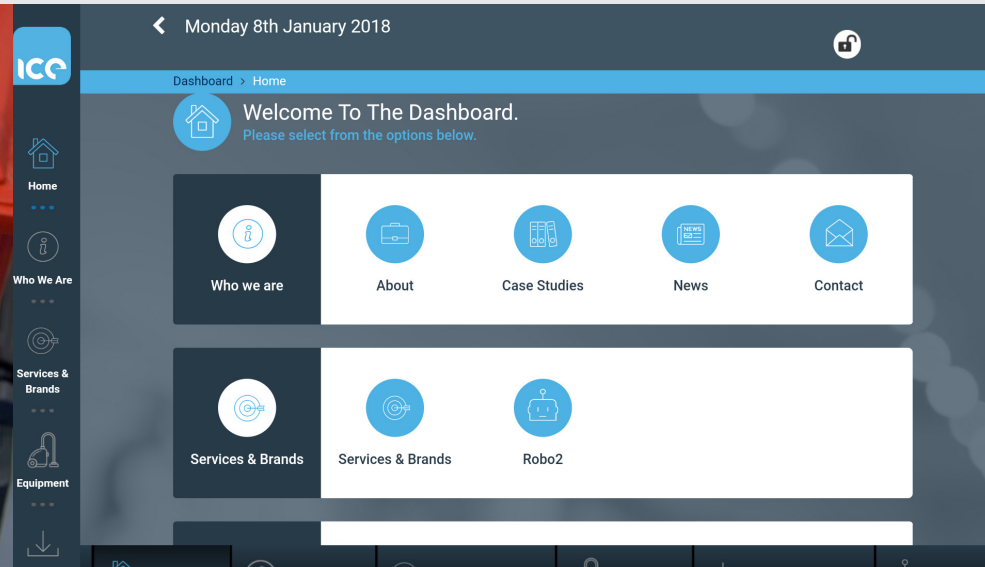

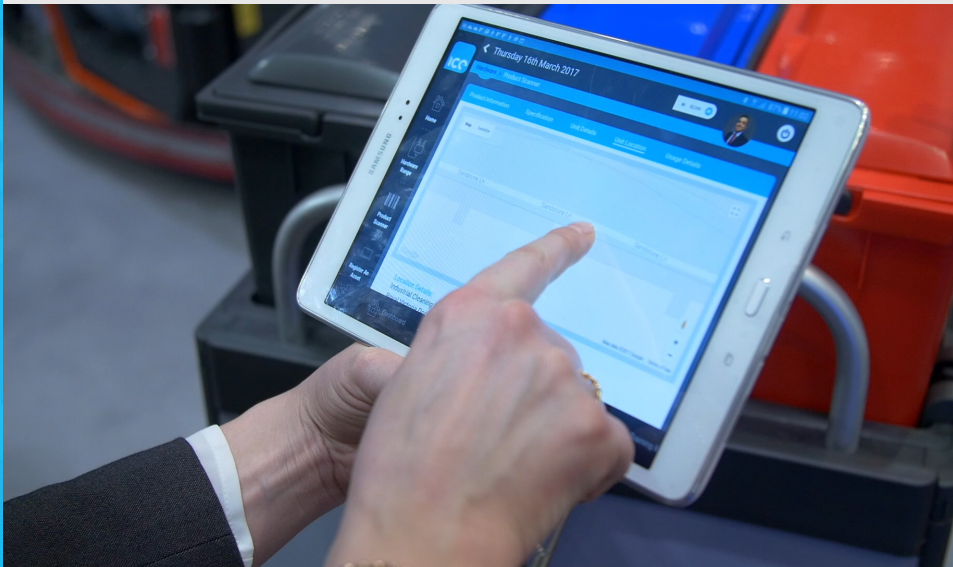

# ICE app

ICE Trak is the ICE service that helps cleaning professionals to improve the performance and increase the productivity of their fleet. It provides a comprehensive overview, updated in real time, of the purchased machines and of the activity being performed.

The telemetry data is collected from the machines and translates them into valuable information that will help you dramatically improve the quality of the service offered.

With one click you can know if the operation is being carried out according to plans, at the scheduled time and place. In this way you can optimise the use of your fleet according to actual availability and eliminate wasted time.

The engineer will know exactly where and how to intervene, avoiding improper service procedures. Careful management allows unforeseen events to be contained, avoids downtime, protects against misuse and theft, ensuring you a fleet always ready to accomplish your goals.

A more efficient organisation allows you to fully harness the potential of your fleet, exploiting your investment to the full.

A better fleet management allows you to:

 Save time & money

 Reduce cost of ownership

 Increase productivity

 Plan investment more easily

 Keep your fleet permanently efficient

 Eliminate downtimes

 Use the fleets as planned

 Offer a transparent service at definite costs

# ICE locator

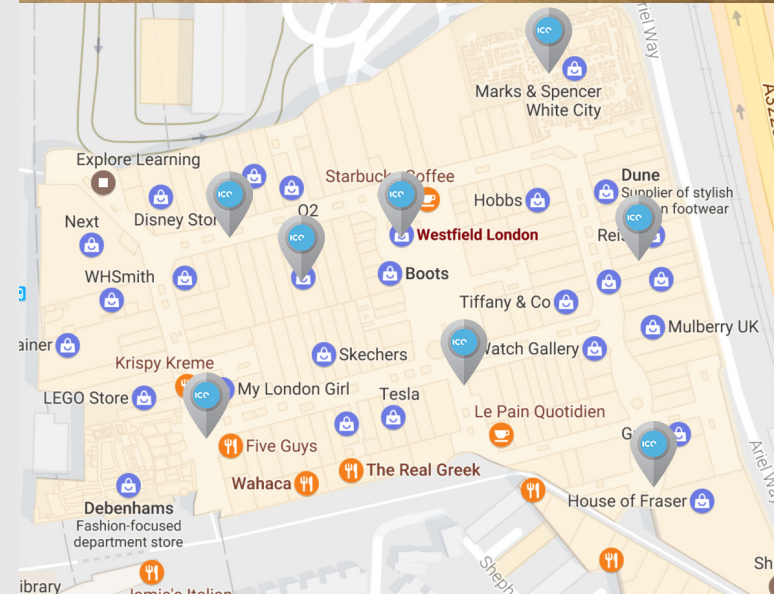

Experience tells us that anything from 5-25% of customer assets are not accurately tracked for a variety of reasons. These include:

- ✓ Internal movement
- ✓ Lack of knowledge or attention
- ✓ Even pilferage

This causes issues with asset management and compliance leading to an unacceptable H&S risk and a significant waste of resource locating missing assets.

## MEET ICE LOCATOR

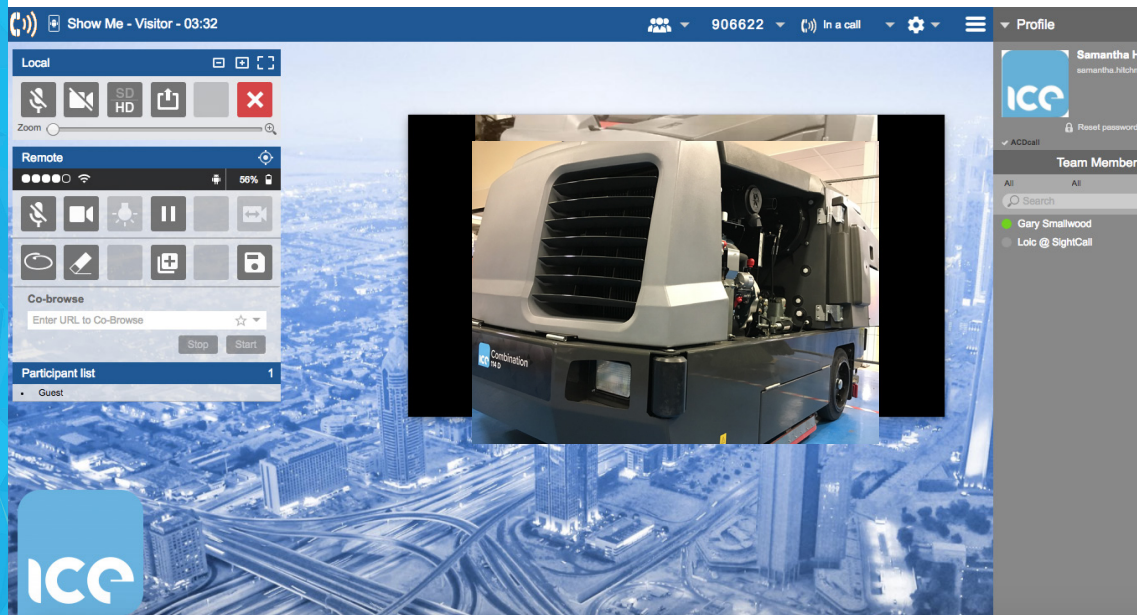

- ✓ ICE locator uses Bluetooth and GPS, providing pin point accuracy of equipment locations.
- ✓ This gives customers complete visibility of all assets across their entire estate, which leads to a reduction in lost equipment, and improved billing accuracy.
- ✓ When the ICE engineer attends a maintenance visit we can be sure of capturing ALL assets quickly and efficiently.
- ✓ This 'industry first' can provide unsurpassed accuracy in terms of asset data - particularly useful for the management of rental equipment.

# ICE smartcall

- ✓ ICE Smartcall is a live video support call for onsite operatives and engineers - with a dedicated team of ICE specialists available to take their calls.
- ✓ At the touch of a button an ICE expert appears on the operatives mobile screen to help with any questions or problems.
- ✓ Our expert is also equipped with their own digital tools, with the ability to see what the operative shows them.

- ✓ The ICE expert can then write on their screen to guide the operative through their problem.
- ✓ Our expert even can share the appropriate manual or navigate to any web page that will help them further, live on their phone or tablet.

'Avoidable' calls are now Smartcalls

## ICE Extended Collection

The ICE core range is extensive and can help with most cleaning functions, but if you need something more specialist, we can still help you.

We specialise in sourcing difficult to find equipment from anywhere in the world. No matter how unique, we will find it for you. So if you need something larger or more specialist to get your site clean, such as industrial steam cleaners, or specialist scrubber dryers, we can help.

Our specialist team have a huge network of contacts based all over the world, and all carefully selected for their commitment to safety and quality that you would expect from ICE.

When you call us you'll be taken care of by a dedicated member of our team, who will see you through the whole process. Once they've ascertained exactly what you need, they'll go out to their network to find the best kit for you, at the best price and get it to you wherever you're working.

ICE Direct (previously Trade Cleaning Machines) is a subsidiary of Industrial Cleaning Equipment, and specialises in the refurbishment of all variations of cleaning machinery.

Year on year there has been an increased demand for refurbished equipment from the markets across the globe, meaning ICE Direct have been able to export large quantities of assets all over the world.

Now with its' own premises, and dedicated workshop & administration teams, Trade Cleaning Machines has become ICE Direct, in order to align the brand with its' parent company, ICE.

ICE Direct offers fully refurbished machines, backed up by service provision for all makes and models of equipment, with a highly skilled nationwide network of Service Engineers. All equipment is delivered, and your staff will be fully trained by the ICE Direct dedicated Prime Team. Top up training is available free of charge also, and instant training requirements are supported through the ICE Training App.

ICE Direct also sells second hand machinery, through its' Trade Counter, and have a huge selection of all types of equipment in stock and ready to go.
