

REMONDIS®

WORKING FOR THE FUTURE

Your partner for non-hazardous pharmaceutical waste processing

> Remondis UK

Remondis UK is part of one of the world's largest water and waste management and recycling organisations, Remondis AG & Co. KG

remondis.co.uk

Why choose Remondis UK for your non-hazardous pharmaceutical waste?

As one of the only providers of R-code status for non-hazardous pharmaceutical waste, Remondis UK offers a complete solution for healthcare providers, care homes, primary care trusts, pharmacies, chemists and wholesalers.

While drug wastage and its cost to the economy is high on the political agenda, it isn't always possible to use everything that is manufactured or ordered. Indeed, patient needs can change at short notice and NHS guidance about the best treatment options does not necessarily stand still.

All organisations handling non-hazardous pharmaceuticals therefore have a duty to manage any excess medications to ensure that non-hazardous pharmaceuticals are processed, treated and sent through the appropriate recovery or disposal channels.

Taking in over-the-counter and prescription medicines in blister packs, solid, liquid or powder form, the experienced Remondis team can repack for onward shipment to our partner facilities throughout Europe, providing a straightforward and cost effective solution that meets environmental and safety requirements.

Whether you want to drop off your non-hazardous pharmaceuticals or you'd like us to pick-up small volumes as part of regular collections in our own vehicles, we will work with you to find the right solution to meet your particular needs. We can even provide solutions for aerosols and laboratory smalls at the same time.

With a nationwide, flexible, 24/7 service, you can trust us to ensure that all waste is handled appropriately, with required compliance, destruction and certification paperwork supplied for your records.

All waste is collected and processed through our ultra-modern, state-of-the-art waste transfer and recycling facility in Merseyside. Built to the highest standards, the Carr Lane site is able to process up to 69,000 tonnes of material each year within a safe, secure and fully-contained 24/7 environment.

> Our specialist services include:

Processing and recovery of all non-hazardous pharmaceuticals through our European network

Management of over-the-counter and prescription medicines in blister packs, as well as solid, liquid or powder form

Small volume collections and repacking of general and household pharmaceuticals for onward shipment

Total waste solutions, including laboratory smalls and aerosols

Complete control of your waste requirements, from collection through to recycling, reprocessing, recovery and disposal
