

REMONDIS®

WORKING FOR THE FUTURE

Your partner for dental waste recycling and disposal

> Remondis UK

Remondis UK is part of one of the world's largest water and waste management and recycling organisations, Remondis AG & Co. KG.

[remondis.co.uk](https://www.remondis.co.uk)

Why choose Remondis UK for your dental waste?

Cost effective and totally compliant collection and recycling solutions for:
Lead foils, amalgam waste, amalgam separators, dental waste liquid containers (fixer/developers), gypsum containers, mercury spillage kits and x-rays.

As a waste producer, dental practices must take all reasonable measures to ensure that waste is dealt with appropriately from the point of production to the point of final disposal.

This is why it is important to partner with someone you trust. We work with our dental customers to reduce costs, save raw materials and make a sustainable contribution to the protection of the environment. Our highly trained team will work with you to find specific custom-made solutions for your requirements. And we provide a nationwide, flexible, 24/7 service.

You can trust us to ensure you receive the maximum yield from your dental waste, while completing all the relevant compliance, destruction and certification paperwork for your records.

All waste is collected and processed through our ultra-modern, state-of-the-art waste transfer and recycling facility in Merseyside. Built to the highest standards, the Carr Lane site is able to process up to 69,000 tonnes of material each year within a safe, secure and fully-contained 24/7 environment.

> Our specialist services include:

Recovery of precious metals from dental amalgam, including amalgam capsules, wet and dry amalgam, extruded elements with amalgam and grindings

Treatment of amalgam separator waste, including the extraction of precious metals from residues in filters and separators

Recovery of precious metals and safe disposal of crowns, bridges and tooth fillings

Recovery of silver from photographic chemicals, fixers, developers, films, foils and x-rays

Reprocessing of gypsum waste which is banned from landfill
