

**REMONDIS®**

WORKING FOR THE FUTURE

Your partner for the management of oil and gas industry waste

> Remondis UK

Remondis UK is part of one of the world's largest water and waste management and recycling organisations, Remondis AG & Co. KG

[remondis.co.uk](http://remondis.co.uk)

# Why choose Remondis UK for your oil and gas industry waste?

**Remondis UK offers collection, treatment, recovery, recycling and disposal solutions for all hazardous and non-hazardous waste streams arising from the onshore and offshore activities of the oil and gas sector.**

Working with direct producers and third parties to provide a catch-all service for businesses operating in the oil and gas supply chain, we accept a wide range of wastes in drums, IBCs and bulk tankers. Our industrial services department, Buchen, also works within refineries to provide additional support when required.

Our UK facility has been purpose-built to manage the processing and packing of crude oil and oil sludges, oily rags and contaminated hoses, as well as pig wax, glycols and coolants. In addition, we take in waste paints and paint solids, solvents and flammable liquids, acids, alkalis and HFO.

Whether you want to drop off your waste or you'd like us to pick-up as part of regular collections in our own vehicles, we will work with you to find the right solution to meet your particular needs. We can even provide specific solutions for aerosols and laboratory smalls.

With a nationwide, flexible, 24/7 service, you can trust us to ensure that all waste is handled appropriately, with required environmental and safety compliance paperwork supplied for your records.

All waste is collected and processed through our ultra-modern, state-of-the-art waste transfer and recycling facility in Merseyside. Built to the highest standards, the Carr Lane site is able to process up to 69,000 tonnes of material each year within a safe, secure and fully-contained 24/7 environment.

## > Our specialist services include:

Working within refineries and with partners throughout Europe to deliver a catch-all service

Management of waste streams including crude oil and sludges, rags, hoses, paints, solvents and flammable liquids

Flexible waste in-take, with acceptance of drums, IBCs and bulk tankers

Total waste solutions, including specialist solutions for laboratory chemicals and aerosols

Complete control of your waste requirements, from collection through to treatment, recycling, recovery and disposal
