ENTRANCE MATS

- Stops dirt and water from entering the premises
- Absorbs excess water
- Prevents slip and fall accidents
- Durable and sustainable
- Helps to create a good first impression

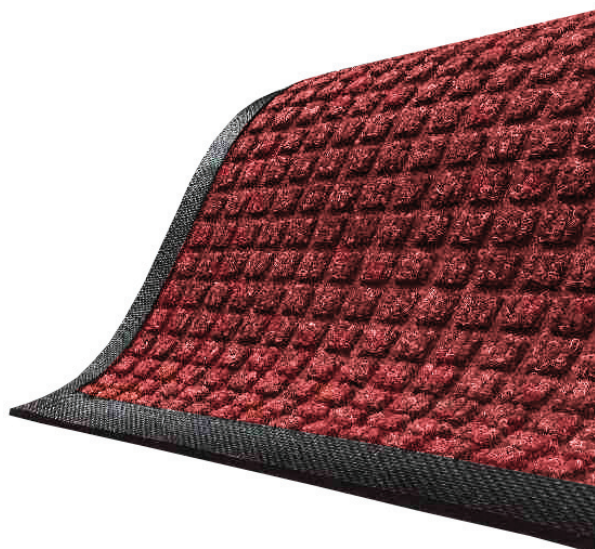

Entrance mats provide a cost-effective way of stopping dirt and water being tracked into your premises and damaging your floors. In fact, entrance mats can help prevent 90% of dirt and water from entering, which helps to create a positive first impression on your visitors.

Entrance mats are also highly durable as they can withstand high foot traffic. With the strong rubber backing, this secures the mat in one place and stops the risk of accidents.

ENTRANCE MATS

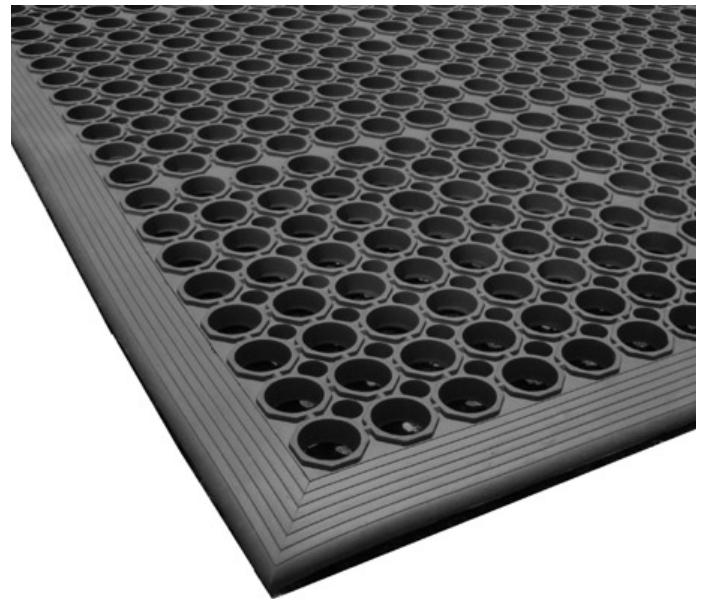

The 3 Mat Entrance System

The best way to ensure maximum dirt and water removal, and so that your building stays clean and safe, is by using the 3 mat entrance system:

Mat 1: Outdoor Entrance Mat – An outdoor rubber mat to scrape heavy dirt from footwear.

Mat 2: Indoor Entrance Mat – A bi-level entrance mat to scrape and wipe footwear, storing until cleaned.

Mat 3: Finishing Mat – To remove any finer dirt, dust and moisture that may be remaining.

Value Rubber Scraper Mat with Holes

What should Entrance Matting do?

STOP DIRT AND MOISTURE FROM ENTERING BUILDINGS

Our Entrance Mats are able to soak up excess water and dirt to leave footwear clean, and prevent tracking.

LOCK IN DIRT AND MOISTURE

Unwanted particles are collected and locked in by the entrance mat until cleaned.

STOP DIRT AND MOISTURE BEING TRACKED OFF MAT

During usage, the entrance mat can stop dirt and water being transferred off the mat.

PROVIDE A SAFE WALKING SURFACE

Due to the strong backing, the mat is completely flat and secured in one place to prevent slips, trips and falls.

Tri Grip - Charcoal

Waterhog Eco - Indigo Blue
